

# Westnet ISDN 10/20/30

Westnet ISDN 10/20/30 access is a 2Mbit/s access into the ISDN network providing ten, twenty or thirty 64kbit/s channels and one 64kbit/s control channel.

Westnet ISDN 10/20/30 are digital services that are available in a minimum of ten lines and can be expanded to satisfy even large organisations.

With an ISDN 10/20/30 service you will be able to connect your PABX, use the indial facility for all your incoming calls; both voice and data. These services also have video and audio-conferencing capabilities (additional equipment is required) and you may also dedicate a few of the lines for video conferencing.

This Westnet ISDN product is available in configurations of 10/20/30 lines or more.

We invite you to contact our Business Solutions Team on 1300 786 006 to tailor a package to suit your needs.

Westnet ISDN 10/20/30 comes standard with 100 number Direct Indial. Direct Indial lets callers contact a person they wish to speak to directly without going through an operator. Allocation of a number range in 100-number blocks.

## Calling Number Display

\$11 Monthly

Set up voicemail and have your own personalised answering service to answer the calls that can't.

## Calling Number Restriction

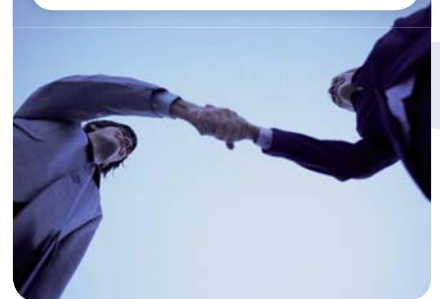

\$6 Monthly

This will prevent the presentation of you number to a person you are calling (exceptions are made in some cases, for instance calls made to emergency services where your number is always presented).
