

Wireless Bridge

The Basics

- Developed by iiNet Labs for use with fetchtv
- Effortlessly stream high definition video between BoB2™ or BoB Lite™ and your fetchtv set top box without wiring or cables
- 5Ghz wireless means faster speeds and less interference with other wireless devices
- Can also be used to wirelessly connect other media applications, such as gaming consoles

Why Wireless Bridge?

- No need for expensive rewiring or running of ethernet cables throughout the home
- Seamless video without jitters or picture problems
- Plug and play – set up in minutes

Availability

- Available from September 2011
- Cost \$119 for a pair
